Home: Rahovec, 21000 Rahovec (Kosovo)

ABOUT ME

Hey there, I'm Kastriot, a 24-year-old from Kosovo. After high school, I studied computer science for three years, but personal struggles during that time hindered my ability to complete my degree. Still, my love for programming didn't fade.

I decided to get better at coding, so I joined a six-month web development bootcamp. It taught me the basics and boosted my skills. After the bootcamp, I landed an internship as a web developer at Imagativ LLC, where I focused on building the behind-the-scenes stuff. In just three months, they liked my work enough to hire me full-time. Now, I'm gaining more and more experience in web development every day.

WORK EXPERIENCE

Web developer (Remote)

IMAGATIV LLC [01/05/2022 – Current]

Website: <https://imagativ.com/>

- manage and maintain content management systems (CMS) for multiple websites
- implement database schema changes and optimizations for improved efficiency
- manage website hosting for optimal performance and reliability.
- coordinating with remote development teams through Git-based workflows
- stay abreast of industry trends and emerging technologies to suggest and implement improvements

EDUCATION AND TRAINING

Web Development Training – Full Stack

Probit Academy [01/08/2021 – 01/02/2023]

City: Prishtine

Website: <https://probitacademy.com/>

- introduction to Web Development, HTML, and CSS
- fundamentals of programming in JavaScript and jQuery
- basics of programming in PHP
- fundamentals of database management with MySQL
- real application coding using lessons from training

PROJECTS

CEL PLATFORM

[25/04/2023 – Current]

Designed and developed a web-based management system specifically crafted for a psychological clinic. The system optimizes client and session management with a suite of features, including:

- a user-friendly interface for adding and managing client profiles , session details, meetings, press releases, policies etc.
- extraction of client data, session summaries, and activities into PDF format for easy documentation and sharing.
- dynamic calendar display to visualize scheduled activities, meetings, and important dates.
- user authorization and role management.

DIGI BROCHURE

[11/09/2023 – Current]

Developed a dynamic Digi Brochure Generator using Laravel. The primary responsibility of the system is to retrieve specified content types from a designated website CMS, customize them, and generate polished brochures in PDF format. Key features include:

- feature to fetch designated content types from a specific website CMS.
- customization features allowing users to tailor the retrieved content according to specific requirements.
- integrated PDF generation capabilities to transform the customized content into visually appealing and printable brochures
- utilized laravel-livewire to enhance the user interface with real-time interactivity, providing a dynamic and responsive user experience
